

Corona2

A further development of the Corona, the Corona 2 has a reduced depth and increased efficiency. Once again the Corona 2 is a general use fitting, it is very suited to offices where good wall illuminance is desired. A choice of 4 lens variants are available (Optika VI, MTX, Q45 or Grid) all housed within the removable central basket.

- High efficiency design
- Choice of 4 interchangeable lens types
- Range of dimming options
- Air handling through luminaire
- Side brackets for most ceilings
- T5 or TC-L lamps

Corona2
