

Washington

An asymmetric linear wall washing luminaire, the Washington provides indirect illumination via the wall surfaces. Suitable for display or general use within most types of space. The Washington features a high purity aluminium reflector, powder coated sheet steel construction and is available in an RGB colour change version. A low height makes the Washington suitable for installations with little available void space.

- Asymmetric light distribution
- Minimal ceiling void required
- RGB colour change version
- Dimming versions available
- Suitable for plasterboard or T-grid ceiling installation

Washington

Product	Available Options	Power	Weight	Height	Width	Length	Cutout
